"YOUR COMPLETE MARKET"

WE WANT TO REDUCE PRICES - YOU CAN HELP TOO
As a RETAILER of FOOD STUFFS we would like to see prices lowered where it would not be necessary for anyone to sacrifice good substantial food.

We can not make much of a reduction so long as WHOLESALE PRICES stay at their present level, but we will gladly pay on to you any savings that might be effected in reducing our operating costs. This can be done by increasing your purchases.

IT IS NEVER WISE TO BUY EXTRAVAGANTLY. PLAN YOUR PURCHASES. BUY TO MEET YOUR NEEDS.

Beginning Saturday, May 17th, and continuing until further notice, we will give you a 5% discount on all purchases of \$10.00 and over.

Evergreen

Evergreen, July 8. The Daily Vacation Bible School was held at Evergreen, closing last week.

Mrs. S. D. Thompson and Mrs. Mary Sullivan, of Lynchburg spent a few days last week with their parents, Mr. and Mrs. G. W. Glover.

Mr. and Mrs. Daniel Jennings and daughter, of Christiansburg, spent the weekend with his parents, Mr. and Mrs. Sam Jennings.

Rev. Simpson preached a fine sermon at the Methodist Church on Sunday. He was the dinner guest of Mr. and Mrs. J. L. Evans.

Mr. and Mrs. Sam White and three children, of Lynchburg spent Wednesday night with her parents, Mr. and Mrs. J. C. Staples.

Mrs. Z. E. Chestnut received word of the illness of her father, the Rev. G. A. Choklett, who is with his daughter, Mrs. Minnie Mastic, at Newport News. We wish for him a speedy recovery.

Well, we thought the Fourth was going to pass away quietly, until an airplane landed in J. R. Hamilton's field near here, causing quite a bit of excitement.

Miss Gwendolyn Paulette is visiting her sister, Mrs. Jack Moseley at Portsmouth, Va.

Mrs. Al Garrett is spending a few days with her daughter, Mrs. Helen Inge.

The wedding bells will be ringing here soon.

Mr. and Mrs. J. T. Gibson and two boys, of Washington, D. C. are visiting her parents, Mr. and Mrs. W. E. Warriner.

Rev. Walter Spoon, from Lynchburg preached a fine sermon at the Christian Church Sunday P.M.

Mrs. T. T. Evans is ill at this writing.

A. B. Ferguson spent Saturday night and Sunday with his daughter, Mrs. Howard Glover.

Rev. and Mrs. R. T. Smith and children visited friends here recently.

Misses Eulalia and Elnora Glover were the Sunday evening guests of Miss Fetsy Ferguson.

Mr. and Mrs. Keran, St. John, of Red House spent Sunday with her mother, Mrs. Al Garrett.

Rupert Garrett, from Norfolk, and Mr. and Mrs. Junior Blackwell from Red House were the weekend end with Mr. and Mrs. Arden Garrett.

Make Gains in Help to Insane

Use of Electrical Current Is Found Efficient in Some Forms of Disease.

NEW YORK.—New advances in the treatment of split personality and some other forms of insanity were related to American Psychiatric association at its annual meeting.

Dr. Esther B. Tietz, Los Angeles psychiatrist, told of experiments with electroconvulsion, a means of maintaining unconsciousness by continued application of electrical current.

She reported 20 treatments had been given to 33 patients, and that of the schizophrenics—those with the split personality—18 of 33 made complete recoveries. Nine were able to return home to more or less normal living; two were moderately improved, and two unimproved. The other two failed to finish the treatment.

In two years, Dr. Tietz said, there were no relapses in this particular group of patients.

All Showed Progress. She reported that of 15 patients treated for depression, all made either a complete recovery or one sufficient to enable them to carry on in a socially acceptable manner.

Dr. Tietz said many of the so-called psychosomatic complaints disappeared. These include headache, gastro-intestinal upset, heartbeats irregularly, migraine, asthma, vague pains, loss of appetite and insomnia.

Electroconvulsion, she said, may offer a short cut to treatment of such disorders.

Another advance was reported by Dr. William A. Horwitz and Dr. Luther B. Kalinowsky of New York State Psychiatric Institute and hospital, who told of combining insulin with electro-shock treatment for the best results.

Both types of treatment, they said, are of value in treating schizophrenia, but better results were obtained in the more serious cases by using the combined treatment.

They treated a group of 80 patients from 13 to 48 years of age between July, 1942, and January of this year.

Many Improved. Immediately after treatment, the doctors reported, one patient was recovered; 21 much improved; 22 improved and 23 unimproved. After three months, there was one recovery, 17 much improved; 29 improved, and 40 unimproved.

The doctors said this "relatively poor proportion" of successful responses was not a measure of the efficacy of the treatment.

A later checkup, the period varying from six months to more than three years, showed 22 much improved, 14 improved and 42 unimproved. Those who were ill the longest before receiving the combined treatment showed the greatest tendency to relapse, they reported.

Neds Holding Onto Secrets

They Uncovered in Germany

WASHINGTON.—William C. Foster, undersecretary of commerce, testified that while the United States has made available to the world all German industrial secrets it has uncovered, Russia has declined to reciprocate.

Foster appeared before a senate appropriations subcommittee. He said that unless a \$1,700,000 fund for operations of the office of technical services is restored to a pending money bill, Nazi technological secrets worth millions to American industry may be lost.

Veterans Buy Big Part of War Supplies, Officers Say

SAN FRANCISCO.—Ninety-one per cent of all merchandise in a recent \$500,000 sale of surplus goods was purchased by veterans, War Assets administration announced.

Major items were maritime galley equipment, most stoves, potato peelers, soap powders, linens and navigational instruments.

Figures released by WAA on another sale showed that the government recovered 10 per cent of the original cost. The sale covered merchandise which had an inventory price of more than \$400,000 and included trucks and trailers, textiles, machinery and large quantities of scrap material.

Need a LAXATIVE?

Minnesota Town's 30 Streets Named for Battlefield Heroes

APPLETON, MINN.—Thirty men from this small community died on battlefields during World War II, and the town's 30 streets and avenues have been renamed after them.

Citizens watched with jumps in their throats as old signs came down and new ones replaced them. They were proud when old Mill street, after a boy killed in the Pacific, became Private High Miles street, after a boy killed in the Pacific.

As they walked along the old Riverside avenue which now was Werring avenue, they remembered Leigh Werring and his brother Bert. Leigh Werring was an infantry captain, killed in the Pacific, and Bert was an infantry sergeant, killed in Italy.

Milk Cooling With Electricity Sound

Better Quality Product Results at Small Cost

Milk customers don't pay off on the quality of milk as it is produced on the farm. It's quality at the point of sale that puts money in the bank.

The dairy farmer, therefore, faces a double task—to produce good milk at milking time, and to preserve that hardwon goodness until his product has been sold.

Preservation of quality requires that milk be cooled quickly, and that it be kept at a low temperature until it is sold.

Water alone is not a satisfactory cooling agent, because only in rare instances is its temperature lower than 60 degrees. The addition of ice to water will help, but storage of ice is a costly business.

Electricity, however, is a more economical way to keep the tank adequately supplied with ice. It is also a more efficient way to eliminate souring and off-flavors.

Because of this situation many electric milk coolers (either of the tank or aerator type) are being installed on electrified farms.
